

Installation and test Guide of OPOS driver

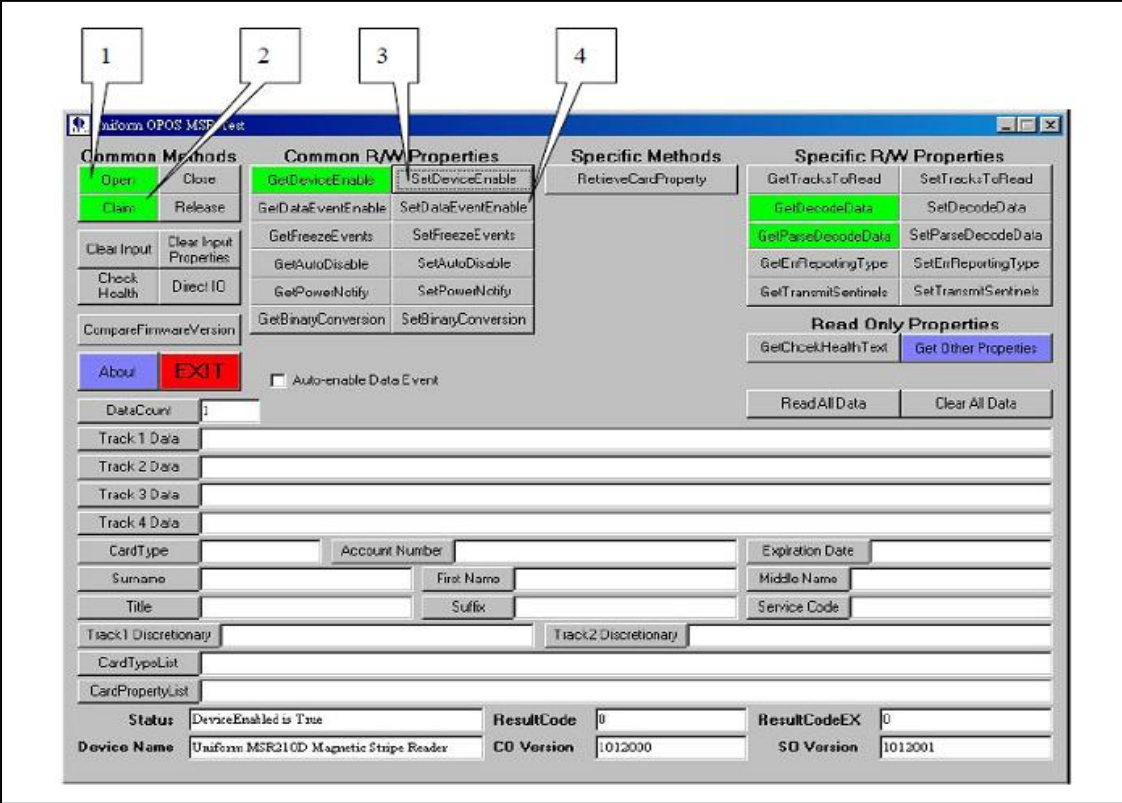

- 1. Unzip the file
- 2. Open the file and inside it has two folders:
  - a) Opos Driver
  - b) Opos Demo Ap
- 3. Install OPOS driver first, and Opos Demo Ap later
- 4. After done with installation, run the MSR213U OPOS SO setting Ver. 213ORS11
- 5. The default local device name must be "MSR213U"
- 6. Click "Update Registry"

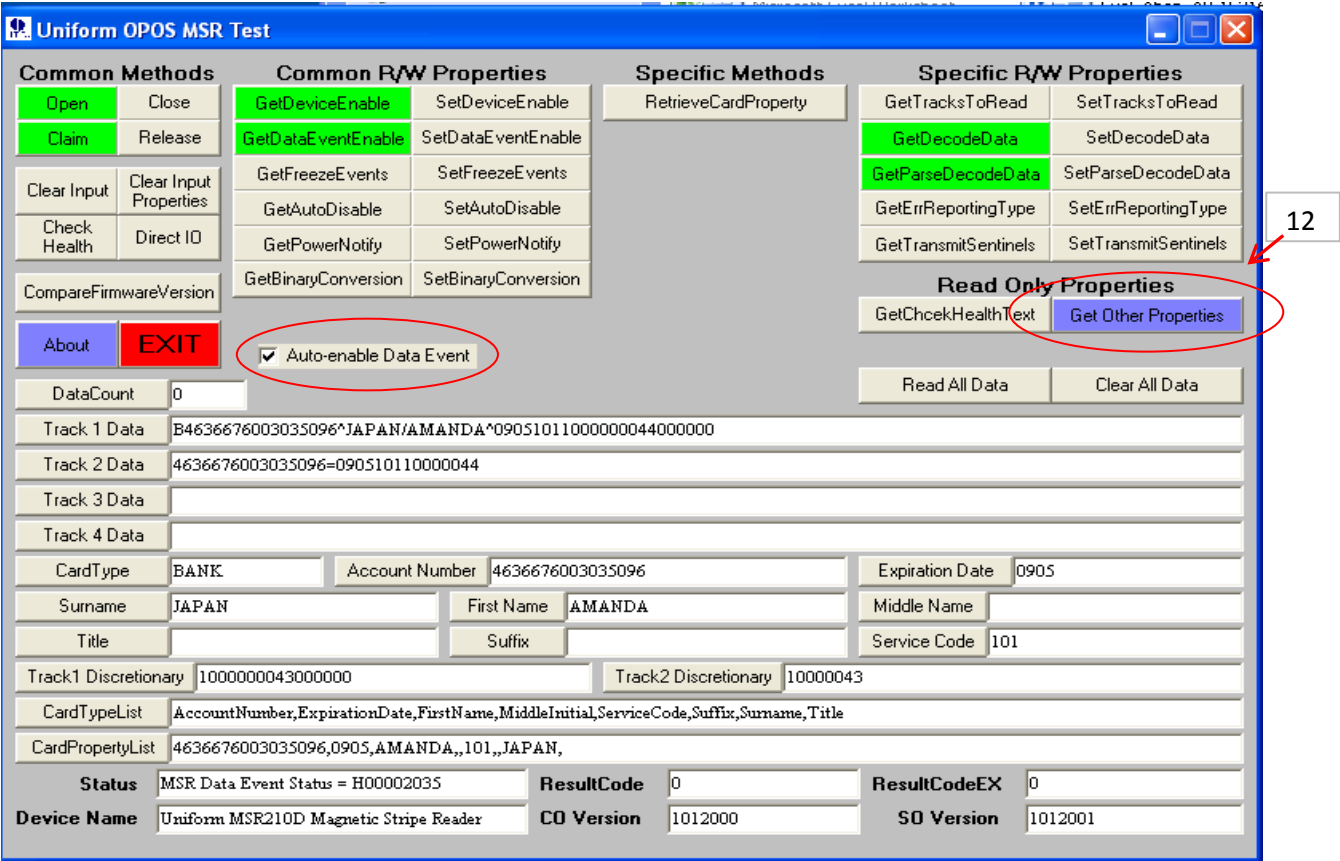

- 7. After you done with Opos setting run the "OPOS MSR TEST"
- 8. Click the "Open" and put MSR name same as the local device name at "MSR210D OPOS Setting AP" window and click "OK"

9. Click 2 - 4 :
- a) No 2 "Claim"
  - b) No 3 "SetDeviceEnable"
  - c) No 4 "SetDataEventEnable"

10. Check "Auto-enable data event"
11. Slide the card and it is going to show on screen below

## 12 How to view OPOS version

Click "Get Other Properties" (See Above)
